WE CREATE SUSTAINABLE VALUE TODAY AND TOMORROW

As a young team, we intrinsically value the protection of our planet and our shared future. In our role as a developer of tech products, we bear direct responsibility for our products and the resulting societal consequences.

For us, sustainability is a holistic concept that takes equal account of environmental, social and economic aspects. We have aligned our strategy with the Sustainable Development Goals of the United Nations Global Compact and are working with specialized partners to realize them effectively.

We regularly assess the impact of our company actions and develop targeted measures to achieve our climate goals and enhance social justice. All our suppliers are carefully selected by third party verifiable, high social standards. We have set an internal carbon price of €50 per tonne that is increased yearly. This enables us to support international projects targeting climate protection and biodiversity.

Our progress can be viewed at any time at vonmaehlen.com/sustainability.

Sustainability is a matter of mindset. Transparency, accountability and frequent communication are therefore the cornerstones of our strategy.

Vonmaehlen GmbH is GRS certified by Innesdex, 2223894.
The Global Recycled Standard (GRS) verifies recycled material
and tracks it from the source to the final product.
